Global Estimates 2014: People displaced by disaster

Revision of estimate for severe storms and tornadoes disaster in Oklahoma state, USA (19 May- 02 June 2013)

A technical error has been corrected and a revised estimate of 10,140 persons displaced recorded in the IDMC database according to latest information. Sources for the revised figure: TDA, Inc., Oklahoma Tornado Disaster and Related Events, Final Report (to US Department of Housing and Development), August 06, 2013 and Oklahoma Department of Emergency Management (OEM) Situation Update 3, 02 June 2013).

The latest version of the full IDMC dataset for 2013, including this disaster, can be downloaded from our website: www.internal-displacement.org.

IDMC, 01 October 2014

Revision of estimate for earthquake disaster in Sichuan Province, Lushan, China (Start date: 20 April 2013)

A technical error has been corrected and a revised estimate of 694,800 persons displaced recorded in the IDMC database. This is based on 193,000 homes reported as destroyed, multiplied by an average household size of 3.6. Sources of figures: The State Council Information Office of the People's Republic of China (Executive Vice Governor Zhong Mian), news conference report, 25 April 2013; and referenced by the International Federation of Red Cross and Red Crescent Societies DREF Operation Update No. 1, 03 May 2013. Please note this revision is not reflected in the figures in the Global Estimates 2014: People displaced by disasters report (published 17 September 2014).

The latest version of the full IDMC dataset for 2013, including this disaster, can be downloaded from our website: www.internal-displacement.org.
