

MACEDONIA

Figure Analysis – Displacement Related to Conflict and Violence

CONTEXT

The majority of displacement in Macedonia was triggered by the 2001 conflict, which was itself driven by tensions between the country’s ethnic Macedonian majority and the largest minority, ethnic Albanians. Very little data and contextual information on displacement is available, but IDMC estimates that a total of 140 people remain displaced today.

New displacements	Total number of IDPs	Partial or unverified solutions	
		Number of IDPs who have made partial progress towards a durable solution	Number of IDPs whose progress towards durable solutions cannot be verified
No data available	140 (Year figure was last updated: 2017)	No data available	No data available
<i>This corresponds to new instances of internal displacement having occurred in 2018.</i>	<i>This corresponds to the total number of individuals living in internal displacement as of 31 December 2018.</i>	<i>This corresponds to the number of IDPs whom our data providers have identified as having returned, resettled or locally integrated in 2018 and for whom the evidence obtained by IDMC suggests that progress toward durable solutions is only partial given their living conditions. In a few instances this number may refer to movements rather than people.</i>	<i>This corresponds to the number of IDPs whom our data providers have identified as having returned, resettled or locally integrated in 2018 but for whom there is no available evidence to corroborate progress toward durable solutions. In a few instances this number may refer to movements rather than people.</i>

TOTAL NUMBER OF IDPS

This corresponds to the total number of individuals living in internal displacement as of 31 December 2018.

Sources and methodologies

IDMC uses the estimates shared by the Ministry of Labour and Social Policy in Macedonia. The ministry maintains the country’s IDP registry.

Main caveats and monitoring challenges

IDMC has not received a comprehensive account of the IDP registration procedure.

IDMC figure and rationale

IDMC uses the total IDP figure as it was in the IDP registry on 31 December 2017.

Significant changes from last year

There are no changes from the figure published in 2017.

CONFIDENCE ASSESSMENT

The Confidence Assessment provides an at-a-glance overview of the comprehensiveness of the data available regarding displacement associated with conflict for each country. It describes the methodologies used, frequency of reporting, data disaggregation and geographical coverage. Here two key metrics are analysed: the new displacements and the total number of IDPs.

Displacement metric	Total number of IDPs
Reporting units	People
Methodology	Unknown
Geographical disaggregation	Country/territory - admin 0
Geographical coverage	All relevant areas covered
Frequency of reporting	Unknown
Disaggregation on sex	No
Disaggregation on age	No
Data triangulation	No triangulation
Data on settlement elsewhere	No
Data on returns	No
Data on local integration	No
Data on cross border movements	No
Data on deaths	No
Data on births	No
